## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:

- Species I: Figure 3
- Species II: Figure 6A and 6B
- Species III: Figure 7
- Species IV: Figure 8

The species are independent or distinct because each species discloses a different arrangement of relaying means. Species I shows an arrangement wherein the relaying means are arranged at an angle of  $\theta$  greater than zero but not 90, species II shows an arrangement wherein the angle is 90 degrees, species III shows an arrangement wherein two relays are arranged side by side and species IV shows an arrangement wherein the relays are arranged on the side of the arm portion and the line element of the relay extends through a seal member.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 3682

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
